## Profile

Product Design Lead with 10+ years of end-to-end product design experience across healthcare SaaS, energy, luxury tech, and consumer retail. I use AI to accelerate the right parts of the process: research synthesis, rapid prototyping, and generative exploration. But the strategic decisions, the product judgement, and the human considerations always stay with me. My guiding principle: *'what can we take away?'* — not what can we add. Simple, intuitive, human-centred solutions are what I'm after, always. In a world where anyone can produce something polished, what separates the work is the thinking behind it. And that's what I focus on.

## Skills & Tools

|            |                                                                                                                                                                                                                                   |

## Experience

### Lead UX/UI Designer

Feb 2023 – Present

[ChilliPharm](#) · [Pharma SaaS](#) · [London, UK](#)

ChilliPharm is a London-based Pharma SaaS company providing clinical trial platforms to pharmaceutical clients and research sites worldwide. The platform had grown organically over several years, leaving behind a fragmented data architecture, inconsistent UI, and a product that was increasingly complex to use. As the company's first dedicated UX design hire, I led a ground-up redesign of the platform, building the design system from scratch, embedding design into the development lifecycle from day one, and mentoring a junior designer through the process.

- Promoted to Lead after building the UX function from scratch; now own design strategy, systems and process end-to-end
- Led ground-up platform redesign, cutting data entry time per assessment by 81% (measured via Fullstory)
- Drove WCAG 2.1 AA accessibility compliance, ensuring clinical trial software meets the highest usability standards
- Co-led strategic service design programme: workshops, stakeholder interviews, personas and journey mapping across the full trial lifecycle
- Designed and maintain the company-wide design system, Storybook library and supporting documentation
- Overhauled the SDLC to embed UX at every stage; ran workshops demonstrating design's business value to stakeholders
- Use AI tools (Claude, Figma AI, Perplexity) to accelerate research and prototyping; strategic decisions stay human-led
- Mentored a junior designer through a structured 6-month L&D; programme, from zero UX experience to contributing team member
- Own brand identity company-wide; took over from external agency work where consistency had drifted, becoming sole design authority across the website redesign, packaging and collateral

## Senior UX/UI Designer

Feb 2021 – Feb 2023

[ChilliPharm](#) · [Pharma SaaS](#) · [London, UK](#)

- Introduced Hotjar, Balsamiq, Storybook and Monday to improve the SDLC; built live Google Analytics dashboards for all seniority levels
- Conducted user interviews, user journey mapping, wireframing and clickable prototyping; iterated on data-driven design decisions
- Collaborated with agencies on marketing website redesign; acted as SME across product, marketing and compliance teams

## UX/UI Designer

Jan 2019 – Dec 2020

[Momentum Energy](#) · [Energy Retailer](#) · [Melbourne, AU](#)

- First internal UX hire — built the design function from scratch; co-led new responsive website and MyAccount platform launch, both central to the business's growth over the following two years
- Created Figma design systems and reusable components; facilitated user testing and face-to-face customer journey mapping interviews
- Represented Digital Design in leadership focus groups; partnered with CX team on large-scale journey mapping and strategic design thinking

## Digital Designer

Sep 2016 – Aug 2018

[Xref](#) · [Recruitment SaaS](#) · [Sydney, AU](#)

- Managed global brand design as company tripled in size; led full rebrand rollout with external agency in close collaboration with founders
- Covered website design, event design, digital, print and front-end code in a high-growth startup environment

## Graphic (Web) Designer

Oct 2015 – Sep 2016

[IPH Limited](#) · [Law Firm](#) · [Sydney, AU](#)

- Sole designer for IPH and Spruson & Ferguson; managed all brand materials including annual reports, presentations and intranet front-end coding

## UX/UI Designer (Android)

Apr 2014 – Jul 2015

[Vertu](#) · [Luxury Mobile Phones](#) · [UK](#)

- Led UX/UI redesign through the Android KitKat to Lollipop OS transition as one of a five-person design team, delivering user flows, icon systems and style guides that kept the interface consistent across a major platform shift

## Web Designer → Graphic Designer

Dec 2010 – Apr 2014

[GAME Retail](#) · [Games Retailer](#) · [Basingstoke, UK](#)

- Self-taught HTML & CSS to transition into web; created banners, feature pages and e-spots for the GAME homepage and category pages
- High-volume POS design for all UK stores — campaigns, press ads, posters and large-format graphics

## Education & Certifications

### BA Hons, Illustration

[University for the Creative Arts](#) · 2006 – 2009

### Foundation Degree, Graphic Media

[University for the Creative Arts](#) · 2004 – 2005
